DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Temnit Afework Reg. No. 58,202 on 2/13/07

The application has been amended as follows:

- Claim 14 should read as follows:

(Currently Amended) A computer-readable storage medium storing a program used to direct a computer forming an apparatus for obtaining position information about a user of plural types of information terminals, comprising:

receiving data including position information from service-asynchronous information terminals that announce position information independent of requesting a service and that support plural types of different communications protocol and/or data format; receiving data including position information from service-synchronous information terminals that announce position information when requesting a service and that support plural types of different communications protocol and/or data format;

converting the received data from the service-asynchronous information terminals to the same format as the data received from the service-synchronous information terminals,; and

Art Unit: 2617

receiving the converted data of the service-asynchronous information terminals with the data of said service-synchronous information terminals; said service-asynchronous information terminals and said service-synchronous information terminals receiving services from across multiple service providers; and wherein said receiving the converted data of said service-asynchronous information terminals and the data of said service-synchronous information terminals comprises

determining a type of an information terminal by the data transmitted from the information terminal of a user according to which a communications protocol and/or data format is employed for the data transmitted from the information terminal, and

extracting the position information about the user from the data transmitted from the information terminal depending on a result of said determining, where a service of the service providers is provided to the plural types of information terminals based on the position information received from the service-synchronous and the service-asynchronous information terminals.

- IDS filed 6/01/07 is a duplicate of IDS filed 10/13/06
